

Seeking to produce high quality and heartfelt sound of
 Chromatic Harmonica,
 Harmonica workshop CREMONA provides Customized
 Harmonica made carefully and precisely

Warm and Profound Sound like the woodwind(All Wood Model: Reiwa AW)

The comb and covers are made of ebony. Ebony is a very dense and heavy wood. That is why CREMONA All Wood Model produces warm and profound sound. The silver plate is embedded in the back side of each wooden cover, which provides you a hybrid of wood sound and silver sound. Moreover, additional weights are embedded in the comb so that its tones get clear outlines and massiveness. The long and deep acoustic opening at the comb base adds more resonance to its sound.

Harmony of warm, brilliant and clear sound : (Wood comb, Silver cover Model: Reiwa GL)

The bomb is made of ebony. The covers and mouthpiece are made of silver (SV925: sterling silver). Ebony is a very dense and heavy wood to produce warm and profound sound. The silver covers produce brilliant and clear sound. The long and deep acoustic opening at the comb base adds more resonance to its sound.

Long Lasting

Some people think that wooden harmonica does not function well for a long time. The wood comb of CREMONA Harmonica is made of very dense wood, so it hardly absorbs water and it keeps its right shape for a long time. Thread grooves are braced with metal, which helps them to endure frequent screw work. Those features make CREMONA Harmonica to be durable even if it is made of wood.

Profound and Brilliant Sound (Silver Comb, Wood cover Model: Reiwa SW)

The comb and mouthpiece are made of silver (SV925: sterling silver) and covers are made of ebony. Ebony is a very dense and heavy wood. The combination of silver comb and wood covers produces brilliant sound as well as warm and profound sound. The silver plate is embedded in the back side of each wooden cover, which provides you a hybrid of wood sound and silver sound. The long and deep acoustic opening at the comb base adds more resonance to its sound.

Brilliant and Massive Sound (All Silver Model: Reiwa SS)

The comb, covers and mouthpiece are made of silver (SV925: sterling silver). Brilliant sound is a characteristic of the silver model. CREMONA All Silver Model produces profound and massive sound as well. The thickness of CREMONA silver covers has effects to soften the sharp grating sound of high range tones and add warm rich sound. The long and deep acoustic opening at the comb base adds more resonance to its sound.

Easy Maintenance

Mouthpiece parts can be easily detached and attached because of a special mechanism of its screw parts. It is helpful when you remove and clean mouthpiece parts after playing. It is also easy for you to do tuning and changing reeds or wind savers because each reed plate is fixed by screws separately.

Special screw for Mouthpiece

Comfortable Silver Mouthpiece

All the CREMONA models come with silver (SV925: sterling silver) mouthpiece. It contributes to sound quality as well as smooth and comfortable fitting to your mouth.
